

Sputtering Targets for Semiconductor Applications

Umicore Thin Film Products

Umicore Thin Film Products, a globally active business unit within the Umicore Group, is one of the leading producers of coating materials for physical vapor deposition with more than 50 years experience in this field. Its Semiconductors portfolio covers a wide range of highly effective sputtering targets and evaporation materials.

About Sputtering Targets for Semiconductors

Semiconductors and electronics play a major role in our world. Just about everything from consumer goods, transportation, housing and manufacturing infrastructure, to large area information systems is based on such technologies.

Umicore Thin Film Products (TFP) successfully develops, manufactures, sells and recycles high quality coating materials for thin film applications in the advanced packaging, compounds, microsystems, and silicon front end segments.

Due to our longstanding experience and strong cooperation with OC Oerlikon (formerly Unaxis and Balzers), our targets and evaporation materials are optimized for maximum performance in OC Oerlikon coating systems.

As an industry leader, Umicore Thin Film Products also provides sputtering targets and evaporation materials to a wide selection of other coating systems. Target size and microstructure are designed to serve the latest sputtering equipment for 300 mm wafer technology.

Our international sales network ensures close co-operation to ensure efficient customer specific solutions and on-time delivery of our products.

Umicore – A world leader in material technology

Umicore is a materials technology group. Its activities are centred on four business areas: Advanced Materials, Precious Metals Products and Catalysts, Precious Metals Services and Zinc Specialties. Each business area is divided into market-focused business units.

Umicore focuses on application areas where it knows its expertise in materials science, chemistry and metallurgy can make a real difference, be it in products that are essential to everyday life or those at the cutting edge of new technological developments. Umicore's overriding goal of sustainable value creation is based on this ambition to develop, produce and recycle materials in a way that fulfils its mission: **materials for a better life.**

The Umicore Group has industrial operations on all continents and serves a global customer base.

Advanced Packaging	WTi10, Au, NiV7, Ni, Ti, Cu, Cr, Al
Compounds	Al, Al-alloys, Ni-alloys, Pt, Au-alloys, Cr, Cu, Ti, W, TCO's, and more
Microsystems	Ta, Ni-alloys, SiO ₂ , Al, Zn, and more
Silicon Front End	Al, Al-alloys, Cr, Cu, Ni-alloys, Ta, Ti, WTi, Au, Pt, Ag, and more

Sputtering Targets suitable for OC Oerlikon, Unaxis, and Balzers Sputtering Systems

Sputtering Targets ARQ151-6"

Description	Symbol	Purity	Form	Part Number
Aluminum	Al	5N5 (99.9995%)	18 mm compound	0483150
AlSi1	AlSi1	5N5 (99.9995%)	18 mm compound	0483305
AlCu0.5	AlCu0.5	5N5 (99.9995%)	18 mm compound	0483273
